Technology End of Life Guide

As a Technology Support Services department, we strive to provide our staff and students with a secure and reliable infrastructure to help support operations and teaching and learning. To help us to better secure, supply, service, and support that infrastructure, it is necessary that we update our equipment on a regular basis. The purpose of this document is to assist administrators on which equipment to target for replacement and how to better plan their budgets and replacement strategies.

For simplicity, we are utilizing the following symbols in this document to help you easily identify equipment that needs to be eliminated as quickly as possible, equipment that needs to be considered for replacement in the near future, and equipment that is in good working condition. In this document, we will use these symbols as well as the colors, red, yellow and green.

Key
1- Eliminate from your school. This year, if at all possible.

sad

2- Plan for replacement in the near future. In 1-2 years.

neutral

3- Equipment is viable for continued use

happy
