

Specialist Health Training Guidelines - Elementary

Specialists

- PE teacher
- Computer teacher
- Music teacher
- Art teacher

1. Gather Specialists names at your school- send names to your school nurse by August 27, 2021
2. Nursing Department will assign Health Training for the Specialist through Vector.
3. The Vector Training will need to be completed by September 17, 2021.
4. After your Specialists have watched the Vector training the Health Aide should arrange a 5-10 minute time to meet with the Specialists to review questions and give them a 4-square Emergency protocol paper and a list of their students with IHPs.
5. Remember- you are NOT training the Specialist to administer any medications or any specific health care tasks. The training is intended to teach them signs and symptoms to watch for and to contact the health aide or office staff with any emergencies.
6. Follow up with your school nurse with any additional questions.
